- » We walk alongside people role-modeling recovery, using our lived experience as a motivating factor.
- » We have used addiction services in the past, and will work with you to find the kind of support that best suits your needs.
- » We support people on OST (Opioid Substitution Programme)

There are a variety of treatment programmes and support groups – who best to explain them than the people who have used them themselves.

We offer hope and support in identifying your strengths to set and achieve your goals.

*Helping people move toward a
productive and fulfilling life.*
